choice

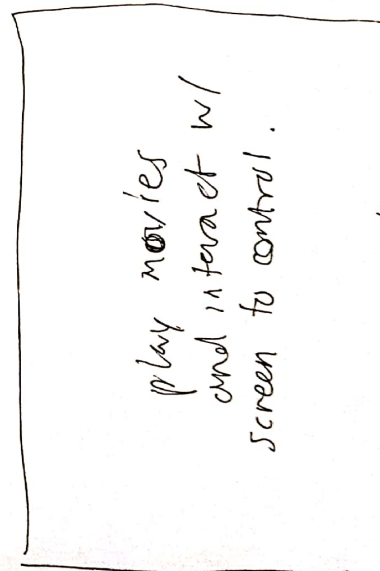

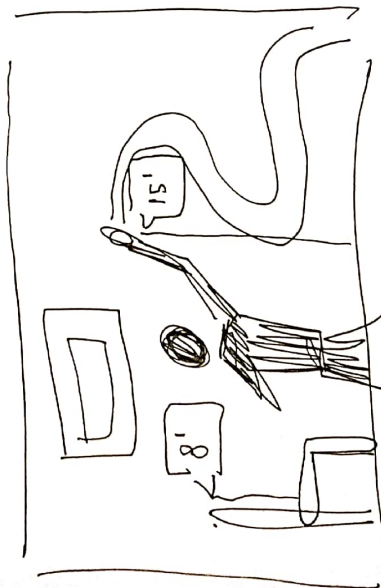

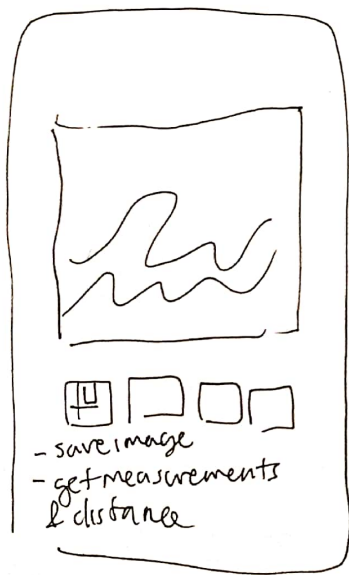

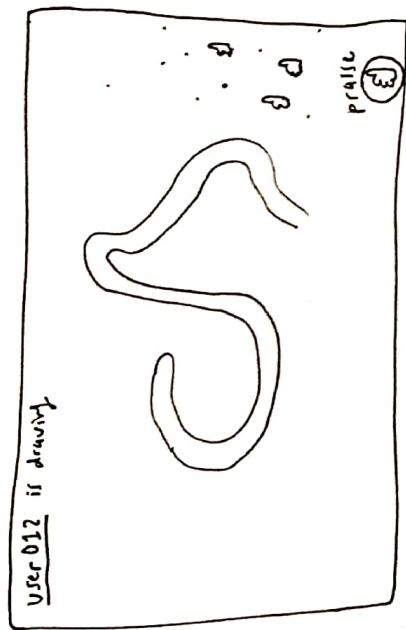

Setup Day Time vs

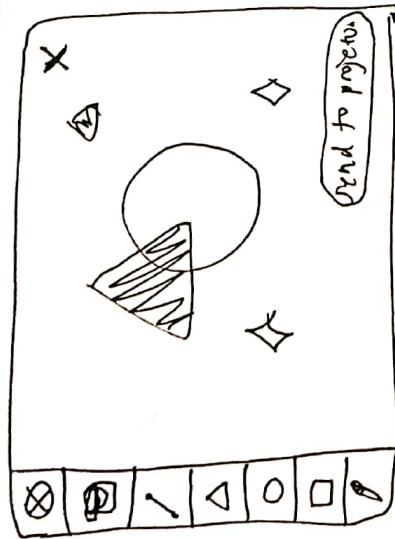

- detects where you are and adjusts image to match your perspective.
- can save screens
- can make dynamic
- measuring mode

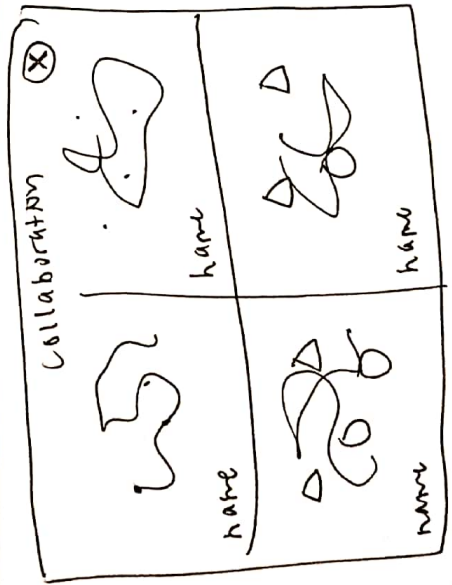

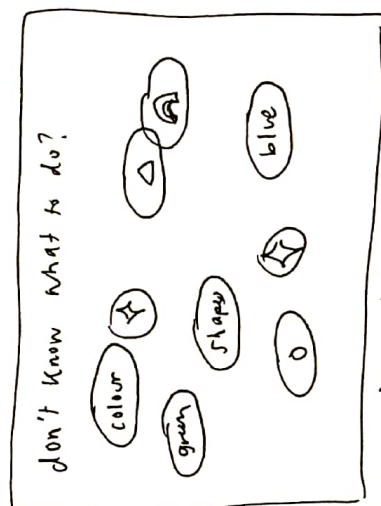

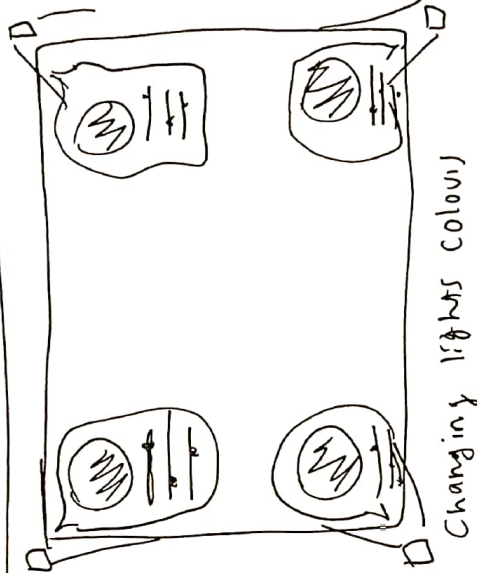

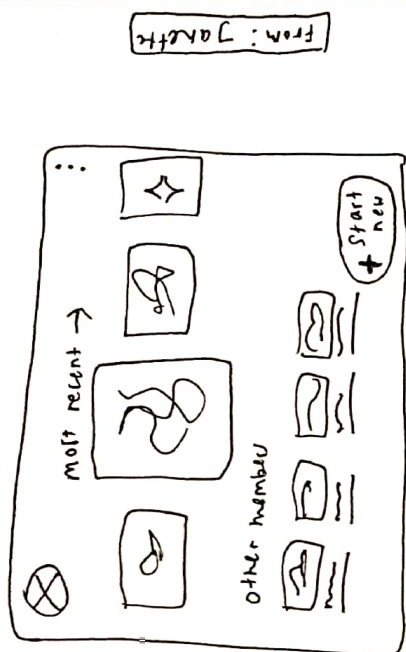

projection: active drawing state

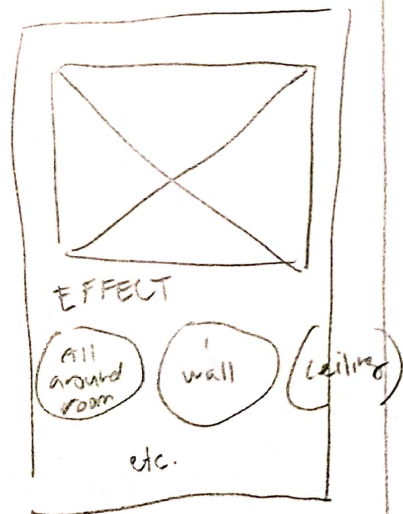

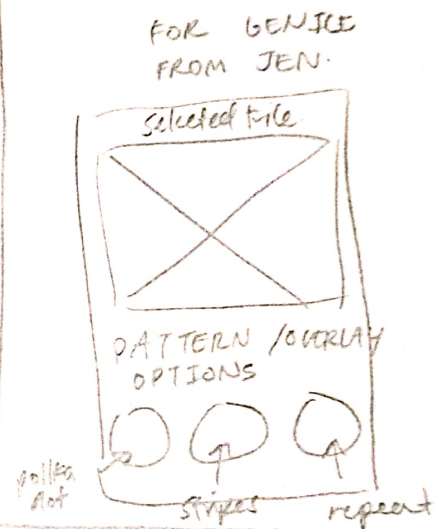

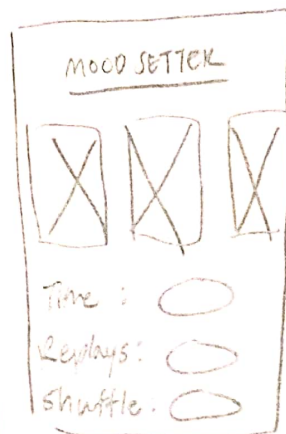

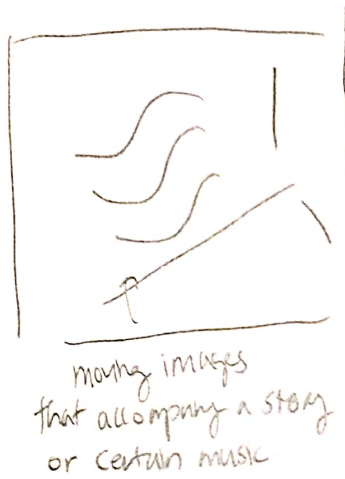

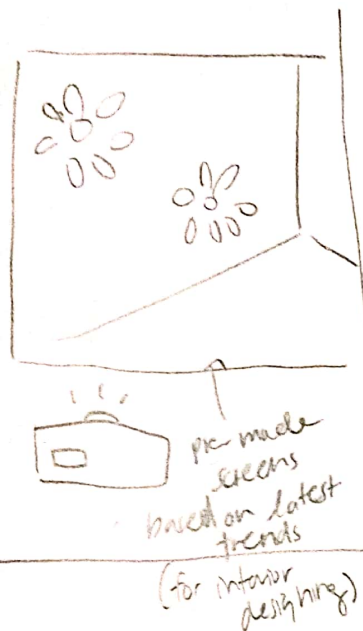

similar to photoshop/illustrator, tools to use

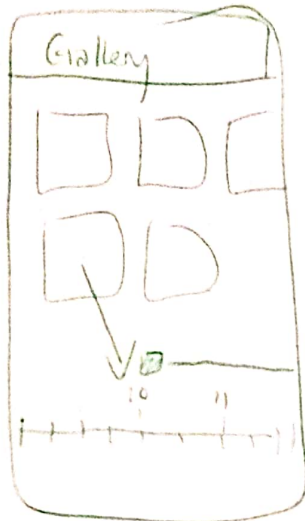

collaboration mode

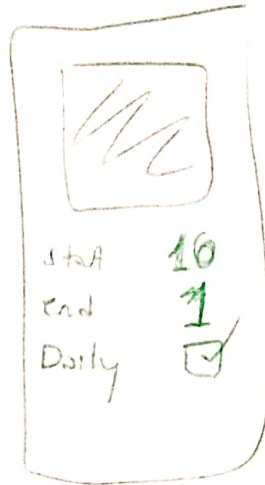

random prompts, touch one to start

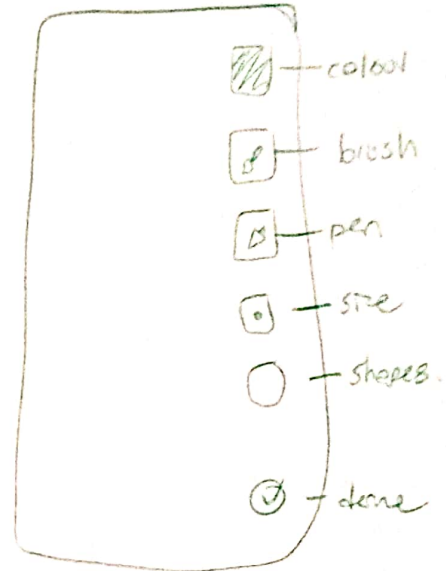

-drag options to timeline and set

-click option to expand & adjust settings.

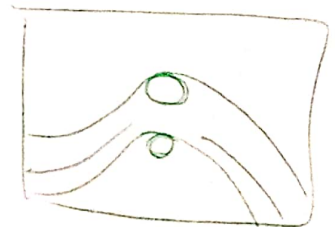

settings.

-create ^{simple} videos that will loop, by moving camera

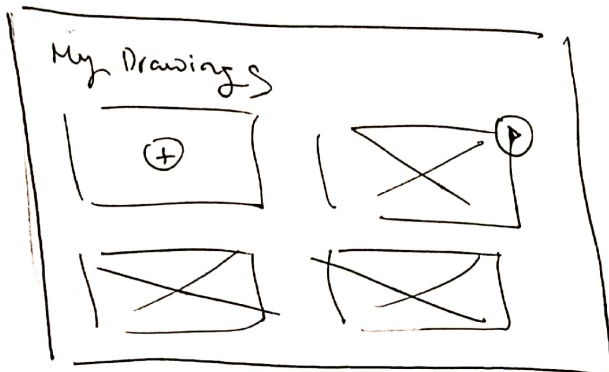

-if you can paint it you could let people create with their entire body through movement and dance.
-the app could change colour or brush randomly, even record a video of the art being created

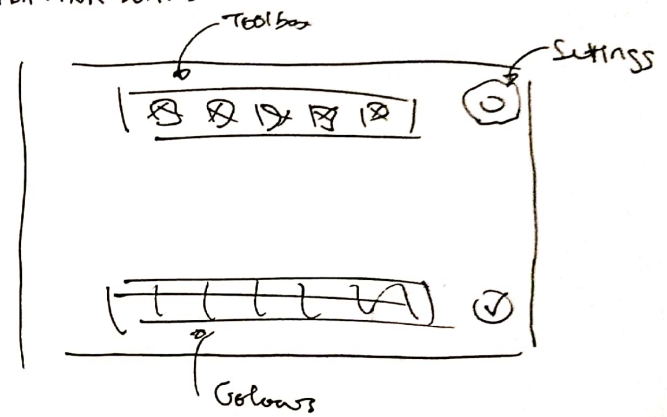

-if it would be like reverse light painting.
-you could record the whole body or just a few lines and then move.
